

# SMART CONTRACT CODE REVIEW AND SECURITY ANALYSIS REPORT

**DeltaFlip**  
\$DeltaF

**27/12/2021**

# TABLE OF CONTENTS

- 1 **DISCLAIMER**
- 2 **INTRODUCTION**
- 3-4 **WEBSITE DIAGNOSTIC**
- 5-6 **AUDIT OVERVIEW**
- 7-8 **OWNER PRIVILEGES**
- 9 **CONCLUSION AND ANALYSIS**
- 10 **TOKEN DETAILS**
- 11 **GREENAIR TOKEN DISTRIBUTION & TOP 10 TOKEN HOLDERS**
- 12 **TECHNICAL DISCLAIMER**

# DISCLAIMER

The information provided on this analysis document is only for general information and should not be used as a reason to invest.

FreshCoins Team will take no payment for manipulating the results of this audit.

The score and the result will stay on this project page information on our website <https://freshcoins.io>

FreshCoins Team does not guarantees that a project will not sell off team supply, or any other scam strategy ( RUG or Honeygot etc )

# INTRODUCTION

**FreshCoins** (Consultant) was contracted by **DeltaFlip** (Customer) to conduct a Smart Contract Code Review and Security Analysis.

**0x3D06CB9E8Fa1c7638a8B3D8d8B8755f1F6B7164B**

This report presents the findings of the security assessment of Customer's smart contract and its code review conducted on **27/12/2021**

# WEBSITE DIAGNOSTIC

<https://www.deltaflip.net/>

0-49

50-89

90-100

Performance

Accessibility

Best  
Practices

SEO

Progressive  
Web App

## Metrics

First Contentful Paint

**1.7 s**

Time to interactive

**5.4 s**

Speed Index

**3.6 s**

Total Blocking Time

**260 ms**

Large Contentful Paint

**6.3 s**

Cumulative Layout Shift

**0.092**

# WEBSITE IMPROVEMENTS

---

Use video formats for animated content.

---

Serve images in next-gen formats.

---

Eliminate render-blocking resources.

---

Ensure text remains visible during webfont load.

---

Image elements do not have explicit **width** and **height**.

---

Avoid enormous network payloads **Total size was 4,306 KiB**

---

Background and foreground colors do not have a sufficient contrast ratio.

---

**<html>** element does not have a **[lang]** attribute.

---

Links do not have a discernible name.

---

Heading elements are not in a sequentially-descending order.

---

# AUDIT OVERVIEW

Security Score

## Static Scan

Automatic scanning for common vulnerabilities

## ERC Scan

Automatic checks for ERC's conformance

High

Medium

Low

Optimizations

Informational

No.	Issue description	Checking Status
1	Compiler Errors / Warnings	Passsed
2	Reentrancy and Cross-function	Passsed
3	Front running	Passsed
4	Timestamp dependence	Passsed
5	Integer Overflow and Underflow	Passsed
6	Reverted DoS	Passsed
7	DoS with block gas limit	Low
8	Methods execution permissions	Passsed
9	Exchange rate impact	Passsed
10	Malicious Event	Passsed
11	Scoping and Declarations	Passsed
12	Uninitialized storage pointers	Passsed
13	Design Logic	Passsed
14	Safe Zeppelin module	Passsed

# OWNER PRIVILEGES

Contract owner has the authority to increase fees up to 25%. The contract's function that can update fees have limitations to what the fees can be up to a total of 25%.

```
function setTokenRewardsFee(uint256 value) external onlyOwner {
    tokenRewardsFee = value;
    totalFees = tokenRewardsFee.add(liquidityFee).add(marketingFee);
    require(totalFees <= 25, "Total fee is over 25%");
}

function setLiquidityFee(uint256 value) external onlyOwner {
    liquidityFee = value;
    totalFees = tokenRewardsFee.add(liquidityFee).add(marketingFee);
    require(totalFees <= 25, "Total fee is over 25%");
}

function setMarketingFee(uint256 value) external onlyOwner {
    marketingFee = value;
    totalFees = tokenRewardsFee.add(liquidityFee).add(marketingFee);
    require(totalFees <= 25, "Total fee is over 25%");
}
```

Contract owner can change wallet address associated with marketing wallet - **setMarketingWallet** function

```
function setMarketingWallet(address payable wallet) external onlyOwner {
    _marketingWalletAddress = wallet;
}
```

Contract owner has the authority to change tx amount. The owner may take advantage of it by setting the **swapTokensAtAmount** to a very small number.

```
function setSwapTokensAtAmount(uint256 amount) external onlyOwner {
    swapTokensAtAmount = amount;
}
```

**Contract owner has the authority to transfer ownership of the contract to a new account.**

```
function transferOwnership(address newOwner) public virtual onlyOwner {  
    require(newOwner != address(0), "Ownable: new owner is the zero  
address");  
    _setOwner(newOwner);  
}
```

```
function _setOwner(address newOwner) private {  
    address oldOwner = _owner;  
    _owner = newOwner;  
    emit OwnershipTransferred(oldOwner, newOwner);  
}
```

### **Recomandation:**

**The team should carefully manage the private keys of the owner's account. We strongly recommend a powerful security mechanism that will prevent a single user from accessing the contract admin functions. The risk can be prevented by temporarily locking the contract or renouncing ownership.**

# CONCLUSION AND ANALYSIS

Smart Contracts within the scope were manually reviewed and analyzed with static tools.

Audit report overview contains all found security vulnerabilities and other issues in the reviewed code.

Found **1** low issue during the first review.

# TOKEN DETAILS

## Details

Buy fees: 10%

Sell fees: 10%

Max TX: N/A

Max Sell: N/A

## Honeypot Risk

Ownership: Owned

Blacklist: Not detected

Modify Max TX: setSwapTokensAtAmount

Modify Max Sell: Not detected

Disable Trading: Not detected

## Rug Pull Risk

Liquidity: 26% locked

Holders: Clean

# DELTAFLIP TOKEN DISTRIBUTION & TOP 10 TOKEN HOLDERS

The top 10 holders collectively own 95.55% (955,467,996.00 Tokens) of DeltaFlip

Token Total Supply: 1,000,000,000.00 Token | Total Token Holders: 42

DeltaFlip Top 10 Token Holders

Source: BscScan.com

(A total of 955,467,996.00 tokens held by the top 10 accounts from the total supply of 1,000,000,000.00 token)

# TECHNICAL DISCLAIMER

Smart contracts are deployed and executed on the blockchain platform. The platform, its programming language, and other software related to the smart contract can have its vulnerabilities that can lead to hacks. The audit can't guarantee the explicit security of the audited project / smart contract.
